

The Downhill Dan 22 extrusion is our most powerful downlighting system. Utilizing two LED strips mounted side-by-side, this profile is ideal for applications where maximum light output is key. A versatile system suitable for various mounting options, Downhill Dan 22 can be surface mounted, recessed and suspended. Both wire and rod suspension options are available for the Downhill Dan 22 extrusion and the recessing systems for plasterboard ceilings and walls create a beautiful trimless finish.
