

Richie Rail 26 is a unique illuminated handrail system with a diameter of 48.3mm. Hollow wall brackets conceal the power supply to the LED strip, and the low voltage input makes the handrail safe to touch. The innovative sliding wall brackets allow minimal power feeds to the LED strip for simple installation. Richie Rail 26 is suitable for use on residential and commercial stairs and thoroughfares including accessible routes and exterior urban spaces. Richie Rail 26 can be supplied as a "plug-and-play" modular system, or as a seamless, fully welded system.
